

THANK YOU FOR CHOOSING SPEEDY SKIPS FOR YOUR SKIP HIRE.

Please find important information below which will help you get the most out of your skip. This includes delivery instructions, correct skip usage and specialist items which may be subject to additional disposal charges.

DELIVERY

At time of ordering or arranging collection, please notify the team of any possible obstructions or restrictions which may prevent safe delivery or collection of your skip. For instance, this may include parked cars, bollards, manhole covers, narrow entrances and overhead objects like trees, telephone or power cables. Our driver will assess the location and should it be deemed unsafe, the driver may refuse delivery until safe access has been established.

Please note, should you request for our vehicle to leave the public highway, you will be doing so at entirely your own risk. We will always endeavour to avoid causing any damage to the site or property; however Allstone Speedy Skips do not accept any liability towards any damage caused as a result of instructions given by the customer or ill preparation of the site for Heavy Goods Vehicles.

In line with our standard terms, you may use the skip for up to 14 days. Once you are finished with your skip, just contact the customer services team who will happily arrange an exchange or collection. Need to keep your skip for longer? No problem, we can arrange an extended rental period for you, just give us a call.

SKIP PERMITS

If you need your skip placed on the public highway, you will need a permit to do so. We will apply for a permit for you via the local authority. You will need to give up to 12 days notice for your application to be processed. Your skip cannot be delivered until the permit has been granted. An

additional fee is applicable for permits and will be confirmed at point of enquiry. The skip permit is valid for 28 days. Permits can be extended providing you apply for a renew no later than 12 days prior to the original expiry date. We will supply lights for the skip.

SKIP USAGE

In line with official Health and Safety Executive (HSE) guidelines we will not be able to collect your skip should it be overloaded or overweight. Overloaded and overweight skips can be dangerous to the vehicle operator, other road users and pedestrians. Fires are strictly not permitted in our skips.

SPECIALIST WASTE ITEMS & SURCHARGES

During the booking of your skip, you will be notified of any specific hire terms relating to your skip. To further assist with correct skip usage, we would like to highlight that the following items will be subject to additional charges due to the specialist nature of their disposal.

- ▶ Fridges and Freezers
- ▶ Plasterboard and film or foil backed plasterboard
- ▶ Vehicle or machine tyres and tracks
- ▶ Paint cans, solvents and mastic tubes
- ▶ Televisions / monitors
- ▶ Asbestos and asbestos suspected material
- ▶ Clinical and medical waste
- ▶ Fluorescent tubes
- ▶ Aerosols, gas bottles, party balloon cannisters, fire extinguishers
- ▶ Large tree roots and tree stumps
- ▶ Liquids including oils, lubricants and flammable substances
- ▶ Lead acid batteries or containers of acid
- ▶ Mattresses, sofas, sofa beds, armchairs and futons
- ▶ Small chairs, such as dining/office chairs, bean bags and floor cushions
- ▶ Air conditioning units and water coolers
- ▶ Hazardous or toxic materials

To review our full standard Terms & Conditions or for further information on skip and waste management, please visit www.speedyskips.co.uk

ASBESTOS

For any asbestos items, please ensure a dedicated enclosed skip is requested and the asbestos waste is double wrapped or bagged and correctly labelled in line with HSE guidelines which can be found at www.hse.gov.uk/asbestos/essentials/

Approved asbestos wrapping, bags and labels can be purchased via Speedy Skips. To ensure adequate disposal, asbestos skips will be collected on specific days. The team will notify you of this once collection is required.

At Speedy Skips we recycle up to 98% of your waste. Our outstanding process rates help divert unnecessary waste to landfill and supports a Circular Economy.
